COLOURS (RAL)

The panels are treated with epoxy paint

● 9005

● 1018

● 7035

Other colours on request

The specific connectors for anchoring the SI.S.MA Series panel to the shelf have been designed to allow the choice of the distance between the mesh and the shelf.

The exclusive design of the connection systems allows the connection with any shelf or profile, without restrictions of size, height and width covering most of the standard spacing available in the market.
